"BUY PLANTS IN JULY? *** WHAT, and WHY?"

YES --- Iris and Peonies are past, and all the multitude of Spring flowers are but memories. Why not think now, of the flowers you didn't have, last Spring, and arrange to have them next year.

Everyone knows that Iris and Peonies should be planted in July and September. But Fall-flowering bulbs should be planted in these months, and Poppies, and Hemerocallis. They get established for the winter, and gain in size to give extra blooms next Spring, if planted now, besides being more dormant, for safe handling. And the Native Plants that bloom so early, - they should be ordered now, at least, for later delivery. Some Rockery Plants can be moved at any time, to fill barren spots, and many other Perennials as well, now thru flowering, can be established with a little care, and become that much more sure to withstand the Winter, and larger, to flower better next Spring. We are planting now, in our own fields. Why not take a leaf from our book?

All prices include delivery to the customer, by the best method, except that West of the Mississippi River, we require 5% extra, to cover increased postage. PLEASE NOTE, --5 plants, ALL ALIKE, at the ten rate. 25 plants, ALL ALIKE, at the 100 rate.

ORIENTAL POPPY, MRS. PERRY.

When the Poppies bloom, they fill the vision entirely with their glory, for with no herbaceous plant, other than these, is there so gorgeous a display of color. Once done flowering, they disappear, to make room for Zinnias, and other showy annuals, which can readily be planted around them, to make a later show. But, when for several weeks, in June, our beds of Poppies were in bloom, everyone wanted to get closer to the display. And it was the soft deep rose of Mrs. Perry, that charmed. There is none of the scarlet of the older sort in this variety, nor in the double Poppy May Queen. The pink in Mrs. Perry does not clash with any other color. It is no new variety, but a well tried and proven sort. And we have never had so many splendid roots to offer.

These Poppies belong in the back of the border, where their place may be filled with tall annuals, or else covered with plants of Gypsophila or Platycodon. But they are effective, if massed alone, against Evergreens. Plant them amongst Pansies, have a few large Zinnias or tall Marigolds ready to put in the place of the Pansies, about the first of July, - the whole against the dark green of Spruce or Hemlock or Pine, and you'll have a splash of color, all season.

In July, when they are dormant, is the very best time to transplant them. Late in summer, they make a small leafy growth, sometimes even flower again. We offer, heavy, two-year old roots, field grown. Better plants we have never sent out. MRS. PERRY. -- 25¢ each; 5 for \$1.00; 10 for \$1.75.

POPPY MAY QUEEN. This is the first good, double Poppy. It is slightly earlier than Mrs. Perry, and deeper in color. While opening, and still cup shaped, it looks like a great rose, but expands to a great flat, bloom with several rows of overlapping petals, like no other Poppy, grown. It is perfectly hardy, and permanent. Heavy two year old roots.

25¢ each; 5 for \$1.00. All prices include delivery.

IRIS.

The following Iris, are among the best of recent introductions, that can be sold at moderate prices. It will be hard to improve on many of these sorts, and as they now cost no more than older varieties, why not discard your old clumps, and replant with these fine sorts.

All at 25¢ each; 10 for \$2.00; 100 for \$18.00, except as noted.

Immediate delivery included in these prices.

AFTERCLOW. Misty lavender, lighted soft yellow at center.

ALABASTER. A milky white of rare beauty. 50¢ each.

AMBASSADEUR. Wonderfully large purple and maroon blooms. Tall and late.

ANNA FARR. White, lightly pencilled blue. Fragrant.

B.Y. MORRISON. Pale lavender standards; raisin-purple falls. Very large.

CAPRICE. One of the best reds.

DEJAH. A tall, early flowering pallida, dark silver blue, and bright blue.

DR. BERENICE. Coppery bronze and crimson. Not large, but showy.

GABRIEL. A clear violet blue. One of the most beautiful Iris. 50¢ each.

HER MAJESTY. A fine pink variety.

HONORABILIS. A showy bronze red and gold variety.

JUNIATA. A clear blue, deeper than pallida dalmatica. Large and fragrant.

IRIS KING. Old gold standards; falls, rich crimson, bordered with gold.

MEDRANO. Very late sort. A beautiful dark smoky claret. Fine when massed.

MME. CHOBAUT. Pale yellow-white flower, streaked with wine-red. Unusual.

MME. CHEREAU. White flowers, with delicately blue pencilled edges.

MORNING SPLENDOR. Very tall. Petunia violet and rich dark purple. Large.

MILDRED PRESBY. White standards; falls dark velvety pansy-violet.

PAULINE. Tall, rich pansy-violet.

PALLIDA DALMATICA. Lavender-blue flowers. Finest foliage of any Iris.

POWHATAN. Light violet and deep purple.

QUAKER LADY. Odd, buff or smoky gray, effects.

QUEEN CATERINA. Pale lavender-violet. White haft, veined with bronze.

RHEIN NIXE. Snow white standards and plum colored falls.

SHEKINAH. A tall, pale yellow bloom. The first yellow pallida.

SUSAN BLISS. A fine pink variety, quite tall and large.

SOUV. DE L. MICHAUD. Rich gentian blue, fading to lavender at the edges. 50¢.

SOUV. DE MME. GAUDICHAU. Violet and purple black. Very large, and showy.

SWEET LAVENDER. Pale lavender standards, deeper lavender falls. Fine.

TRUE CHARM. A lovely frilled, white, variety.

WYOMISSING. Creamy white, overspread soft rose. Hard to obtain. 50¢ each.

YOLANDE. A wonderful velvety dark purple. Large 35¢ each; 10 for \$3.00.

IRIS CRISTATA.

The little Crested Iris, is so happy in slight shade, or amongst rocks in the side of the Rockery, where it makes a delightful patch of gray-green leaves, all season. It is fine for carpeting banks, and the roots intertwine to form a close mat that prevent erosion. The flowers, coming so early, and nestled amongst the foliage, are a clear light porcelain blue, unlike any other dwarf Iris. It may also be used as an edging, but is most at home at the foot of a tree, or as described above. We have a wonderful stock of fine large clumps. Single plants, 25¢ each. 5 for \$1.00; 10 for \$1.75; 25 for \$3.75; 100 for \$10.00

CRISTATA ALBA. The rare white form of the preceding is offered at \$1.00 each, while the supply lasts. Good sized plants. Both of these sorts can be planted now.

All prices include delivery, except as note on Page 1.

PEONIES.

All of our Peonies are one year old plants, from divisions made in 1932. They have flowered, and are splendid plants at the prices asked. The varieties include all but the very newest, and many of these we offer will never be surpassed. All prices include delivery. No plants can be shipped before September first, but after that until October.

ALBATRE. Better than Festiva Maxima. The finest white Peony. 75¢ each.

ALBERT CROUSSE. Very late, seashell pink flower of perfect shape. \$1.00

BARONESS SCHROEDER. A large, late, white, like a water lily. \$1.00

CHESTINE GOWDY. Silvery pink, growing deeper at the center. \$1.00

CLAIRE DUBOIS. A later M. Julcs Elie. Wonderful silvery sheen. \$1.25 each.

DORCHESTER. The latest Peony. Fine deep pink, almost salmon. \$1.00

DUCHESS DE NEMOURS. Fine early white. A good moderate priced sort. 50¢

EDULIS SUPERBA. The earliest rose-pink sort. First Peony to open. 75¢.

EUGENIE VERDIER. An early, extra large pink sort. Lasts well. \$1.00

FELIX CROUSSE. The best midseason red. Few better at any price. 75¢ each.

FESTIVA MAXIMA. The favorite white. Pink tipped petals. 50¢ each.

FRANCES WILLARD. An immense flower, blush-white, fading to pure white. \$2.

GEORGIANNA SHAYLOR. Extremely large, flesh-pink flower. Midseason. \$2.00

JAMES KELWAY. Rose-white, changing to milk-white. Early midseason. 75¢

KARL ROSENFIELD. Fine rich velvety crimson. Midseason. Good. \$1.00

LADY ALEXANDRA DUFF. Immense, cup shaped bloom. Pale rose, shading lighter

LA FRANCE. Large, compact, rose-white. Midseason. \$2.50 each (\$1.00)

LE CYGNE. The world's finest Peony. White. Very large. \$2.50

LIVINGSTONE. Pale lilac-rose, with silver tips. Compact double flower. 75¢

LONGFELLOW. Brilliant crimson. Brightest colored sort we grow. \$2.00

LOUIS V.N. HOUTTE. A midseason, red. Double and good. 50¢ each.

MARGUERITE GERARD. Pale pink, fading to white. Enormous flat flowers. 75¢

MARIE CROUSSE. Pale lilac rose. Bomb type. Midseason. 75¢

MARIE LEMOINE. Latest white, and a fine large double sort. \$1.00

MARTHA BULLOCK. Very large. Deep rose pink, fading silvery pink. \$2.00

MARY BRAND. Finest red Peony grown. Midseason, and lasts well. \$1.50

MME. AUG. DESSERT. Bright rose, center flecked crimson. Early midseason. 75¢

MME. DUCEL. Large incurved silvery-pink bloom. Midseason to late. 75¢

MME. EMILE GALLE. Sea-shell pink. Eternally beautiful. \$1.00

MME. JULIUS DESSERT. Pure white, with distinct pink center. \$1.50

MONS. JULES ELIE. Finest early rose colored sort. Always fine. 75¢

OFFICIN. LIS RUBRA. Early red "Decoration Day" Peony. \$75¢

PRIMEVERE. The nearest to yellow in this type of Peony. \$1.50

SARAH BERNHARDT. Apple-blossom pink. Immense flowers. \$1.00

SOLANGE. No other Peony like this. White, shaded brown. Beautiful. \$1.00

THERESA. Rich violet-rose. Enormous flower. \$2.00

TOURANGELLE. Delicate rose, over pearly white, shaded salmon. Late. \$1.50

TR. DE L'EX. DE LILLE. Flat fragrant hydrangea pink blooms. Fine. 50¢

VENUS. Pale hydrangea-pink with lighter collar. Midseason. 75¢

WALTER FAXON. Bright rose. A distinct, delicately colored bloom. \$1.50

SINGLE PEONIES.

These are in demand, for their landscape effect, and their charm. The opening buds are like roses.

LA FIANCÉE. Single white. Indescribably graceful flower. \$1.00

L'ETINCELANTE. Rich clear carmine, broadly edged with silver. \$1.50

HYBRID HEMEROCALLIS.

The improvement in this family, is so great as to be almost unbelievable. And until the colors have been seen, and the long succession of varieties have all bloomed, over all the summer period, one cannot fully appreciate them. They are preminently a summer flower. Strong and vigorous, and perfectly hardy, they rank with the Peony, for a place in the Hardy Border. Good for cutting, fragrant and combining well with all colors. Blooming over a long period. And fine in garden effect. They are bound to become more and more popular.

We offer fine heavy clumps, divided in 1932. They will increase greatly in size; if planted now, and be in fine shape for flowering in 1934. May be planted at any time, from July to October. Delivery at once, or at any desired time.

APRICOT. Clear bright orange flower, good size and excellent form. June 50¢

ANNA BETSCHER. Deep orange touched bronze red. Early July. \$1.75

BAY STATE. Very large, pure glistening yellow flowers. July to August. \$1.

DR. REGEL. Late flowering, with rich apricot flowers. Fragrant. 50¢

D.D. WYMAN. Light golden yellow, with a tawny splash. July and August. \$1.50

FLAVIA. The lemon Day Lily. An old variety, still fine. Fragrant and excellent for massing. Heavy plants. 30¢ each, 10 for \$2.00; 100 for \$18.

GEM. Deep orange yellow blooms in early July. \$1.50

GEO. YIELD. Large flowers, nearly 6" across; rich orange and orange scarlet blooms. Strong growing, extra fine English variety. \$2.50

GOLDENI. Deep golden orange flowers in Early July. \$1.00

GOLDEN BELL. Soft apricot-orange with darker throat. July, August. \$2.00

GOLDEN DREAM. The latest, and the deepest colored sort. Deep golden yellow. Extra fine sort. \$2.00

GOLD DUST. Large, rich, clear golden yellow flowers, in June. 35¢ each.

GYPSY. Orange-yellow. Tall, strong growing. July, August. \$2.00

HYPERION. One of the few American plants to win an award of Merit in England. The finest Hemerocallis, we have. Purest canary yellow blooms on 4 foot stems, the flowers 5-6" across. \$2.00

J.A. CRAWFORD. Extra large, cadmium yellow and apricot flowers. June to July. We consider the best in its color. \$1.00.

LATEST. A fine deep color, and one of the last to bloom. August. \$2.00

LEMONA. Pale lemon yellow, late. A glorified flava. Lovely. \$1.00

LUTEOLA MAJOR. Splendid orange-yellow. July, August. 50¢. (\$2.00)

MRS. A. H. AUSTIN. Large flowers, deep golden yellow. July, for a long period

MRS. W. H. WYMAN. Very pale, glistening yellow. Late August. Very delicate. \$1.

QUEEN OF MAY. Clear apricot-yellow. Nice for cutting. 50¢

RADIANT. A splendid clear pure orange. Next to Hyperion in quality and texture of the flower. \$2.00

ROYAL. A wonderful Japanese hybrid. Canary yellow. Wonderful texture. \$2.

SHIRLEY. A fine English sort, with lemon-yellow flowers, streaked with apricot-yellow. Flattened flowers. \$2.00

SOVEREIGN. Free flowering English variety. Orange yellow blooms, shaded brown on the outside. June \$2.00

THUNBERGII. An older form, fine for combining with flava to prolong its season. Buttercup yellow. 30¢ each; 10 for \$2.00; 100 for \$18.00

VARIEGATED LEAF. This is probably Kwanso variegata, tho from an odd source. The leaves are attractively striped with cream. Scarce. \$2.00

All prices include delivery, except as noted on page 1.

TROLLIUS.

Trollius or Globe Flower, are among the finest flowering plants of May. They will thrive in almost any soil, tho their preference is for a deep, and moderately moist loam. Left undisturbed, they become large clumps, which will carry sometimes fifty of the large globe shaped yellow flowers. The colors vary from the palest canary yellow, to deep orange. They are especially fine if planted back of Anchusa myosotidiflora, or other low growing blue flowering, May bloomer.

The named sorts we offer are especially choice sorts. The flowers are larger, and more double. They vary in season of bloom, to permit a long succession. They grow evenly in height, and the color is, of course, exactly alike, in each plant of a variety, so that they lend themselves readily to massed color effects. And, best news of all, we are now able to offer, fair sized plants at moderate prices.

Strong divisions, 25¢ each; 10 for \$2.00; 100 for \$18. Except as noted.

CANARY BIRD. Pale lemon yellow, tall and strong growing. One of the first to bloom, and very fine for cutting.

EARLIEST OF ALL. Light orange-yellow, and very early, sometimes opening in April. Often too, it flowers again, later in the season.

ELEANOR. A fine bright yellow variety, flowering profusely in late May, and into June.

EXCELSIOR. Bright orange-red flowers. Grows two feet high, and is a fine strong growing sort that will give a good second bloom, if cut down as soon as thru flowering.

FIRE GLOBE. Bright orange, semi-double flowers, on a moderately low plant. A very popular variety, tho not as bright as Orange Globe.

GOLDEN GLEAM. Golden yellow, and a very large double flower. One of the more recent varieties. 35¢ each; 10 for \$3.00

HIS MAJESTY. One of the very best, with very large, round, orange-red flowers. Dwarf and compact.

LICHTBALL. Extra large, globe shaped flowers of orange-yellow, on strong stiff stems. Fine for cutting. Plant of medium height.

LODDIGESI. This is an extremely fine form, with bright golden flowers, which maintains a close round shape until the flower fades.

ORANGE GLOBE. A profuse bloomer, of robust growth. Very fine, large orange flowers. We have a good stock of the true variety, not seedlings.

SALAMANDER. This is a fine orange variety, flowering late. It is tall and strong, is fine for cutting, and especially for garden effect.

TROLLIUS SPECIES.

T. ASIATICUS. This is a small, bright orange sort, with a single row of petals, and many pointed petaloids, in the center.

T. CHINENSIS. This variety is a larger edition of asiaticus, in color and form of flower. It is a tall (3') sort, with fine glossy foliage. The plant is strong and robust. It is splendid for garden effect. But its greatest value lies in its late flowering date. It is at its best from late June, to early July. A favorite with all who see it here.

T. EUROPEUS. We have a selected stock of the true form with pale lemon yellow flowers. While not large, it is a fine sort, and is surpassed by Canary Bird, only. It is slightly paler than that variety.

MIXED SEEDLINGS

We have some fine two year old clumps of Trollius, raised from seed saved from the above named varieties. The flowers we have seen inclined to the deeper colors. They are splendid plants, sure to please, and are offered at the same price as the lighter divisions.

ROCKERY PLANTS.

A number of plants, suitable for the Rockery, either should be put out at this time, or else may be had to give immediate foliage effect. Because of the nature of most of those which are of the latter sort, they will stand transplanting at any time, and in the case of many, we have grown them in pots, before planting in the fields, so that there is a compact ball of roots, as well. All are field plants, not from pots.

ADONIS AMURENSIS FL.PL. Blossoms in late April. Wooly flowers like large Dandelions, from finely divided foliage. The blooms open green, but become clear yellow when fully expanded. Dormant now. 50¢ each.

ANEMONE SEPTEMBER CHARM. This fine variety of the Fall flowering group is available in potted plants, which have but recently been put into the ground. If shipped now, and planted and tended, they will flower in September and later. 25¢ each; 5 for \$1.00

CHRYSANTHEMUM AMELIA. Plants of this early dwarf Chrysanthemum, are in bloom in our beds now. Later flowers will succeed the ones now open. The entire plants are but 18" high. They wintered outside, with but light covering. We offer 2½" potted plants, which will flower lightly this Fall, and be ready for winter. Or they may be used for potted plants, and will give a wealth of pink flowers, in August and September. Potted plants, from 2½" pots. 35¢ each.

DRABA OLYMPICA. Mossy green mounds of tiny foliage. In early Spring they are covered with tiny golden flowers. Fine for immediate effect. 25¢

LEUCOCRINUM MONTANUM. This little plant throws up a long succession of small white Crocus-like flowers, in Spring. Now dormant. It should be grouped with Lilium tenuifolium, etc. in the rockery. 15¢ each; 10 for \$1.

SAXIFRAGES. All of the encrusted Saxifrages, can be transplanted at this time, with safety. They provide immediate foliage effect, and need only shade against the heat of the afternoon sun, and a soil, with lime, and small stones, and a little leafmold. Fine for edging crevices in the Rockery. We will send one each of the following ten sorts for \$3.00

AIZOON: BALCANA ROSEA: BALDENSIS: FLAVESCENS: LAGAVEANA: CARTILAGINEA: CRUSTATA: ELLIOTT'S SILVER: GAUDINI: MACNABIANA. All heavy clumps.

SEDUMS. The various sedums, tho now past blooming, are of value for leaf color, in the Rockery, and if planted at this time, will be heavy plants by Fall. We offer a collection of one each of the following sorts for \$2.

ACRE: ALBUM: DIVERGLNS: HISPANICUM: HYBRIDUM: MIDDENDORFIANUM: NIACENSE RADIATUM: SPATHULIFOLIUM: STOLONIFERUM.

SEMPERVIVUMS. These are especially fitted for midsummer planting, as the fleshy leaves retain moisture and permit much handling. We have many splendid forms, and can offer moderate sized clumps of any of the following, at 25¢ each; 10 (alike) for \$1.75.

ARACHNOIDEUM: BLANDUM: CALCAREUM: FAUCONETTI: GLAUCUM: JURATENSE: LAGGERIS: PALLIDUM: PITTONI: PYRENAICUM: SOBOLIFERUM: THEOBALDI: TRISTE.

A collection of one each of the above, will be sent for \$3.00

CACTUS.

We have two Cacti, which have been perfectly hardy here, and which have grown well, and flowered. Strong plants of either are available, as noted, but of the Opuntia, a leaf section is the preferable size.

ECHINOCEREUS VIRIDIFLORUS. An upright cushion, with many spines, which flowers by small offsets. Flowers greenish white. 50¢ each.

OPUNTIA MACRORHIZA. According to Bailey, a form of O. humifusa. Large branching gray pads, from the top of which come large yellow flowers, with reddish brown bases. Grows readily from a leaf section, and is of ironclad hardiness. Large plants, 50¢ each. Leaf sections, 25¢ each. (A leaf section is unrooted, and should be planted half its depth in soil.)

HARDY PERENNIAL PLANTS.

The many plants which flower during the early part of the year, may properly be planted best, shortly after flowering. They are generally quite dormant, for a time after seed ripens, and then start a Fall growth. We divide and reset many things at this time, to have large plants for next year. If you are wanting any of these, now is a good time to order.

ANCHUSA MYOSOTIDEFLORA. Fine for planting with Trollius. Strong plants which will be heavy clumps next Spring. 25¢ each; 10 for \$2.00

ANEMONE VERNALIS. The finest early Spring Anemone, resembling a great white Crocus, with a pink flush, rising from downy leaves, and protected by a wooly coat. Plants in small pots, but recently planted in the field. 25¢ each; 10 for \$1.75; 100 for \$15.00

ANEMONE PULSATILLA. The Pasque Flower. A larger Anemone than the one preceding, and not quite so early. We offer it in mixed plants, either red or lavender, at 25¢ each, 10 for \$1.75

A. PULS. ALBA. A rare white form of the Pasque Flower. 50¢ each.

CORYDALIS NOBILIS. Flowers very early, neat mounds of fine foliage and attractive yellow flowers. Dies down completely in midsummer. 25¢.

DICENTRA FORMOSA. Plumpy Bleeding Heart. Fine edging plant; for massing in beds alone, as it will flower all summer; or for the rockery. Pink flowers above finely divided foliage. 25¢ each; 10 for \$2.00; 100 for \$18.00

DICENTRA SPECTABILIS. Our fields of Bleeding Heart are already ripening off, and they can now be dug and shipped with safety. Planted at this time they are sure to be well established for Spring. Strong roots of this popular plant for, 25¢ each; 10 for \$2.00; 100 for \$18.00

DORONICUM CAUCASICUM. Splendid, tall growing, yellow daisy-like plant. The blooms appear before Trollius, and add a fine touch of color, to the Spring garden. Everyone wants it, when in bloom. Because it dies down after flowering, it is never thought of until again in flower. It should be planted now, and we offer the small black roots, which will make a good plant next Spring at 15¢ each; 10 for \$1.25

EUPHORBIA COROLLATA. This and the following are relatives of the showy Poinsettia. The flowers are small, but the showy yellow bracts, give lots of Spring color. One of the best yellow, Spring plants, growing about 18" high, and with splendid foliage all season. 25¢ each; 10 for \$2.00

EUPHORBIA MYRSINITES. This has thick blue green leaves, and looks like a peculiar Sedum. Very fine large Rockery plant. 25¢ each; 10 for \$2.00

EUPHORBIA SEEDLINGS. One year old seedlings of either of the above. 10¢ ea.

LUPINUS POLYPHYLLUS. Lupins now come in a wide range of colors, and in addition to blue, white and pink, which we can supply in separate colors, we have a fine strain of hybrids, in fascinating shades. The Lupin is now partly dormant, and may be handled with fine success. We offer strong clumps, for immediate delivery at 25¢ each; 10 for \$2.00

PHLOX DIVARICATA CANADENSIS. This fine early dwarf blue Phlox is now in a dormant state, and may be divided and reset. It is a fine time to do so, to be sure of good effect, next Spring. Strong plants. 25¢ each; 10 for \$2.00; 100 for \$18.00.

POLEMONIUM REPTANS. Makes a large clump of finely cut foliage, and has branching heads of pale blue flowers. Grows about 18" high, and is fine for planting with Trollius. 25¢ each; 10 for \$2.00

VIOLET ROSINA. We can send at this time, strong plants of this finest of Hardy Sweet Violets. As the young plants develop, about the clump, they will flower, and perfume the Fall garden. And they'll be well established for next Spring flowering. 25¢ each; 10 for \$2.00; 100 for \$18.00

VIOLA ODORATA. Plants of these Sweet Violets, at the same price as Rosina. We have both Blue and White. Please specify. 25¢ each; 10 for \$2.00

FALL FLOWERING BULBS.

The Fall flowering types of Crocus, the Colchicums or Meadow Saffron, and the Hardy Amaryllis, or Lycoris, differ from most bulbs, in that they make a lush growth of foliage in the Spring, then disappear, leaving, in some cases, large seed pods, which have apparently formed without the aid of any flowers. In September, and sometimes even earlier flowers appear from the bare earth, as if by magic, and continue to open for many days. Large and showy, without having over-large bulbs, the Crocus and Colchicums are fine for Fall color in the Rockery and Border. The Spring growth comes before the plants are crowded, and is not apt to bother other things. But they must be planted in July, as soon as the Spring growth is dead, if they are to be at their best, this Fall. Order them now, for delivery when ripe, and plant immediately when received.

COLCHICUM.

AUTUMNALE. Large lavender cups, sometimes two inches across, in succession over a long period. 35¢ each; 10 for \$3.00

AUTUMNALE MAJOR. A slightly larger form, and deeper in color. Very vigorous and has many flowers per bulb. 35¢ each; 10 for \$3.00

AUTUMNALE ALBUM. White form of the common Colchicum. Very lovely and delicate. 35¢ each; 10 for \$3.00

BORNMULLERI. An exquisite rosy-lilac. This variety flowers early, and is the largest of the family. 50¢ each; 10 for \$4.50

CROCUS.

SATIVUS. This is the best of the Fall flowering Crocus, with large lilac purple flowers, with a showy orange center. They flower for a long period, at a time when their color is appreciated. 10¢ each; 10 for 50¢

SPECIOSUS. Bright blue with deep orange anthers. 10¢ each; 10 for 50¢.

ZONATUS. Beautiful large rose-lilac blossoms with yellow center and an orange zone. A striking beauty of delightful coloring. 10¢ each; 10 for 50¢. --- Any of above \$3.00 per 100

LYCORIS.

SQUAMIGERA. This is also called Amaryllis hallii. The strong leafy growth dies down in midsummer, and in September, tall stems of pink flowers shoot up with astonishing rapidity, and last for a long time. Very choice and rare. Our stock is limited. \$1.00 each.

Two of the native Western bulbs we have tried have done well here, so that we can offer home grown bulbs. Camassias should be planted in late midsummer. Erythroniums in July. Both flower readily and are satisfactory here at Shelburne.

CAMASSIAS.

ESCOLENTA. Two foot spikes of blue flowers in May, from a strong clump of leaves. Fine for naturalizing, or for clumps in the border. We have strong home grown bulbs. 15¢ each; 10 for \$1.00; \$9.00 per 100

LEICHTLINI. A taller and stronger Western form. Lighter blue flowers. Equally hardy. 15¢ each; 10 for \$1.00.

ERYTHRONIUM.

Of these we have ALBIDUM, white, GRANDIFLORUM ROBUSTUM, large yellow, and JOHNSONI, rose pink, in home grown bulbs. The first two are 10¢ each 75¢ for 10; \$6.00 per 100. Johnsoni at 15¢ each; 10 for \$1.00. Ready in July. Order at once, as they will not last.

COLLECTED NATIVE PLANTS.

Many native plants are available in unlimited quantities, and are fine help in our gardens, particularly those that are shaded. It is quite customary to collect these plants from the wild, and supply them at the regular seasons. There are two objections to this. First, in Fall, at the end of the growing period, many of the earlier sorts have so completely disappeared, as to make collection very difficult. The result is disappointment to the purchaser. Second; all of these plants start into growth, with the first warm days, and those who delay in placing their orders until the ground is warm, and easily worked, are too late to get the bloom of that season. For this reason, many plant-men dig these Natives in early Autumn, and store them in cold cellars over Winter, keeping them dormant, in Spring. This we do.

It is impossible to forecast sales, and the result is sometimes wasteful, and again disappointing, if enough are not stored. The ideal way would be to dig in Fall, for Spring delivery, exactly the quantity needed. And, with your help, we propose to do this.

We offer the following list of Native Plants, at lowered prices. Delivery can be made at any time from July, until November, at these prices. Or, if you will give us your order now, we will dig and store these plants, and deliver them in good condition, next Spring, at these prices. We ask only that 50% of the amount of the order, accompany it. We shall store but a very few plants above those ordered, and prices will be distinctly higher, in the Spring. Why not help us, and yourselves as well, by ordering as early as possible.

All at 25¢ each; 10 for \$1.50; 100 for \$10.00, except as noted.

5 (alike) at the ten. rate; 25 (alike) at the 100' rate.
